Web -based shopping system displays shopping cart on display terminal, so that user is able to load products offered from different web sites into shopping cart and to select loaded products

Abstract (Basic):

... A networked computer (56) displays a shopping cart on a display terminal (57), so that user is able to load products offered from different web sites into the shopping cart and to select loaded products . The billing data corresponding to the selected product is transmitted to different web sites, in order to purchase the selected product .

DETAILED DESCRIPTION - ...

...1) web -based shopping method; and...

...2) web -based shopping program product .

...

...For purchasing products through Internet...

...Enables user to selectively remove or delete products from his shopping cart irrespective of the web page in which he is currently located and the user is able to move his shopping cart from one web page to another without checking as he leaves the particular web pages...

... DESCRIPTION OF DRAWING(S)...

ELECTRONIC COMMERCE SYSTEM

INTL CLASS: **G06F-017/60**

ABSTRACT

PROBLEM TO BE SOLVED: To provide an **electronic commerce** system capable of **eliminating** the anxiety of losing or leaking the **personal information** of a user.

SOLUTION: In this **electronic commerce** system, a user terminal 201 is connected to the shop servers 301 and 302 of...

...user terminal among the merchandise presented by the shop servers is put in a shopping **basket** and the user terminal requests the **purchase** processing of the merchandise put in the shopping **basket**. A **basket** management server 101 for transversely managing the **basket** information of the shopping **basket** used in a plurality of the shop servers is provided. The **basket** management server stores user information in a customer DB 601, unitarily manages it, also receives the **purchase** processing request of the merchandise by the user terminal and unitarily performs the **purchase** processing of the merchandise put in the shopping **basket**. The respective shop servers composite the merchandise information of the present shop and the **basket** information sent from the **basket** management server and present the information to the connected user terminal. Since the **personal information** of the user is not presented more than needed, privacy is protected.

Detailed Description

... of the instant invention, the menus
provide for functionality tools including, but not limited to, **digital**
wallet, 15 **shopping cart**, user profiling, and advertising. The
digital wallet, universal **shopping cart**, and user ...present
invention, the menus provide the option to link to various functionality
tools such as **digital** wallet and **shopping cart** (see Figures 3a, 3b,
5a, and 5b). The integration of these modules into the flexible...

...cart option displayed on the menu, and can then pay for any item in the
shopping cart through the **digital** wallet option displayed on the
menu. The user does not have to search the Net for independent **shopping**
cart and **digital** wallet modules since these modules are both
available through the menu. Furthermore, the menus possess...

...and objects to load the cart with user preferred items. Items can be
selected and **removed** with ease and **purchased** without difficulty
through the integrated modules in the menus. One objective of the present
invention...

...overcome the current shortcomings resulting from a lack of integration
of specific functionalities, such as **digital** wallet, universal
shopping cart, and user profile which are presently neither integrated
nor interlinked. Currently a user may have...

...Abstract: subtle, change occurring: the emergence of the electronic marketplace. The Internet and its uses for **electronic commerce** are fundamentally transforming the way we live, work and communicate. In the insurance industry much of the discussion about **electronic commerce** has centered around if and when consumers will buy insurance **products** and services over the Internet. Clearly, **no** one has made much money this way to date. **Business** -to-consumer **electronic commerce** will likely continue growing acceptance across all consumer industries-including insurance.

PRIVACY AND RELIABILITY IN INTERNET COMMERCE (DATA AVAILABILITY, DIGICASH, MICROMINT, SECURE SOCKET LAYER, ANONYMOUS CREDIT CARDS, FIRST VIRTUAL, SECURITY)

In this work I examine the conflict between consumer privacy and data availability in **electronic commerce** systems designed for the Internet. In particular I focus on the relationship between **anonymity** and reliability. I do not include systems which require that the consumer has dedicated hardware...

...suggestions for possible changes in the regulation of retail transactions.

I select a set of **Internet commerce** protocols and argue that these are representative. These protocols are: Digicash (Chaum, 1985), traceable Digicash (Chaum, 1985), MicroMint (Rivest, 1996), Secure Socket Layer (Freier, 1996), Secure Transactions Technology (Mastercard, 1996), **Anonymous** Credit Cards (Low, 1993), NetBill (Goradia, 1994), and First Virtual (First Virtual, 1995a). I consider...

...introduce a certified delivery layer for the provision of the highest degree of atomicity with **anonymous** currency. After the discussion of regulatory fit, or how well the system provides consumer privacy...
